-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

### ***Specification***

1. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter.

There is no description of the term "flangeless hem" as it appears in claims 38 and 46.

See 37 CFR 1.75(d)(1) and MPEP § 608.01(o).

### ***Claim Objections***

2. Claims 9 and 22 are objected to because of the following informalities:

In claims 9 and 22, the word - -curved- - should be inserted between "the" and "outer" in line 2 to be clear which outer surface is being claimed. Further in claim 22, the term "an" in line 1 should be changed to - -a- -.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 43 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claim is indefinite because term "tab" lacks antecedent basis in the claim.

The claim is so indefinite that it cannot be examined on the merits.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1, 2, 8, 11, 12, 13, 15, 16, 18, 19, 20, 21, 24, and 25 are rejected under 35 U.S.C. 102(b) as being anticipated by Kintsler (cited by Applicant).

The ring-shaped flange member is shown at 96, the wheel cladding is shown at 78, and a portion or lip 94 of the flange is located within the groove 92 on the rim of the wheel as shown in figure 6.

7. Claims 1, 2, 12, 15, 16, 18, 19, 21, 23, 24, 25, and 26 are rejected under 35 U.S.C. 102(b) as being anticipated by Tanghetti (cited by Applicant)

As shown in figure 4, the cladding has a ring-shaped flange at its outer edge and a lip 9, 15 which extends into the groove in the rim. The rim and the cladding each have an outer curved surface.

8. Claims 1, 8, 9, 10, 11, 12, 15, 18, 19, 21, 22, 23, and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by Heck et al (cited by Applicant).

As shown in figure 3, the flange is considered to be the unlabelled radially outwardly extending portion of the rim flange around which the cladding extends. The

Art Unit: 3617

cladding has an annular lip 70 which engages the curved surface and creates a positive lock.

9. Claims 1, 8, 11, 12, 13, 14, 15, 18, 19, 20, 21, 23, 24, 25 and 26 are rejected under 35 U.S.C. 102(b) as being anticipated by Eikhoff '843 (cited by Applicant).

The outer edge 18 of the rim is the flange member and the cladding wraps around the flange. The annular lip 64 engages the shoulder 62 and provides a positive lock between the flange the cladding.

10. Claims 38, 42, 45, 46, and 51 are rejected under 35 U.S.C. 102(b) as being anticipated by Buerger.

Note the folded lip portion 32a of figure 4.

11. Claims 38, 42, 45, 46, and 51 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Wright et al.

12. Claims 38, 39, 40, 42, 45, 46, 47, 48, 50, and 51 are rejected under 35 U.S.C. 102(b) as being anticipated by Lyon.

Note the folded lip portion 24.

### ***Allowable Subject Matter***

13. Claims 3-7, 17, 41, 44, and 49 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

14. Claims 27-37 are allowable over the prior art of record.

**Conclusion**

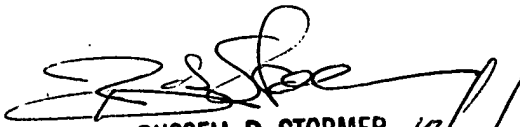

15. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references show other wheel cover assemblies.
